Anti-Climb fence panels

The name says it all: it is hard to climb over these temporary fences.

Premium Anti-Climb Round Top Smartweld Panel

If you require a top of the range fence panel, the Premium Anti-Climb Round Top is the one. The 3 sides are formed from a continuous tube, eliminating the top corner weld, often the weakest point in traditional panel design. Other colours available.

Anti-Climb Round Top Heavy Duty

This fence panel is the solution for ease of use and deterrence. Because the top corners are curved, the frame cannot break at the top corners, which ensures an optimal functionality and a longer longevity. Other colours available.

Anti-Climb Std Smartweld Panel

This fence panel benefits from Smartweld technology and is available as standard or heavy duty. An excellent choice for any temporary location and any budget. The close wire spacing is in accordance with HSG151 guidelines.

Readyhoard and Steelhoard

With these fences, it is impossible to view the site. This provides more security and privacy.

Readyhoard Std Panel 2.0m High Galv

Heras Readyhoard is a portable steel hoarding system that can be installed in ground or on ground. These panels provide a good site security and privacy. Available in a range of corporate colours and in two different heights (2.0m and 2.4m).

Heras Steelhoard temporary fencing

Heras Steelhoard provides a temporary hoarding system consisting of a unique set of individual components that are assembled on-site to produce a continuous and seamless hoarding façade. A high-quality, reusable solution for your site.
