

Mobile Fencing & Security

Heras Steelhoard

A unique set of individual components. Assembled on site to produce a continuous and seamless hoarding façade.

Safe

- Highest level of Safety & Security. Surpasses the requirements of TWf1220-02 and BS5975:2008+A1:2011
- Will withstand all site specific wind loading requirements for the UK
- Height: 2.4m

Extremely durable

- 10 re uses easily achievable.
- Design life of 25 years
- All components 100% recyclable

Most cost-effective system available

- Currently 50% cheaper than timber hoarding based on multi use and full cycle cost
- Flat pack modular design reduces transport and storage costs
- Maximum longevity through heavy duty components with durable surface treatments

Best looks

- Free from joints and uninterrupted by posts
- ideal for the installation of flat advertising media
- Box profile sheets can be detailed to corporate requirements in any RAL or BS color

Mobile Fencing & Security

Checklist ✓
